

§ 2201. Transfers of spoils of war**(a) Eligibility for transfer**

Spoils of war in the possession, custody, or control of the United States may be transferred to any other party, including any government, group, or person, by sale, grant, loan or in any other manner, only to the extent and in the same manner that property of the same type, if otherwise owned by the United States, may be so transferred.

(b) Terms and conditions

Any transfer pursuant to subsection (a) of this section shall be subject to all of the terms, conditions, and requirements applicable to the transfer of property of the same type otherwise owned by the United States.

(Pub. L. 103-236, title V, § 552, Apr. 30, 1994, 108 Stat. 482.)

SHORT TITLE

Section 551 of Pub. L. 103-236 provided that: “This part [part B (§§ 551-556) of title V of Pub. L. 103-236, enacting this chapter] may be cited as the ‘Spoils of War Act of 1994’.”

§ 2202. Prohibition on transfers to countries which support terrorism

Spoils of war in the possession, custody, or control of the United States may not be transferred to any country determined by the Secretary of State, for purposes of section 2780 of title 22, to be a nation whose government has repeatedly provided support for acts of international terrorism.

(Pub. L. 103-236, title V, § 553, Apr. 30, 1994, 108 Stat. 482.)

§ 2203. Report on previous transfers

Not later than 90 days after April 30, 1994, the President shall submit to the appropriate congressional committees a report describing any spoils of war obtained subsequent to August 2, 1990 that were transferred to any party, including any government, group, or person, before April 30, 1994. Such report shall be submitted in unclassified form to the extent possible.

(Pub. L. 103-236, title V, § 554, Apr. 30, 1994, 108 Stat. 482.)

§ 2204. Definitions

As used in this chapter—

(1) the term “appropriate congressional committees” means the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives, or, where required by law for certain reporting purposes, the Select Committee on Intelligence of the Senate and the Select¹ Committee on Intelligence of the House of Representatives;

(2) the term “enemy” means any country, government, group, or person that has been engaged in hostilities, whether or not lawfully authorized, with the United States;

(3) the term “person” means—

- (A) any natural person;
- (B) any corporation, partnership, or other legal entity; and
- (C) any organization, association, or group; and

(4) the term “spoils of war” means enemy movable property lawfully captured, seized, confiscated, or found which has become United States property in accordance with the laws of war.

(Pub. L. 103-236, title V, § 555, Apr. 30, 1994, 108 Stat. 482.)

CHANGE OF NAME

Committee on Foreign Affairs of House of Representatives treated as referring to Committee on International Relations of House of Representatives by section 1(a) of Pub. L. 104-14, set out as a note preceding section 21 of Title 2, The Congress.

§ 2205. Construction

Nothing in this chapter shall apply to—

(1) the abandonment or failure to take possession of spoils of war by troops in the field for valid military reasons related to the conduct of the immediate conflict, including the burden of transporting such property or a decision to allow allied forces to take immediate possession of certain property solely for use during an ongoing conflict;

(2) the abandonment or return of any property obtained, borrowed, or requisitioned for temporary use during military operations without intent to retain possession of such property;

(3) the destruction of spoils of war by troops in the field;

(4) the return of spoils of war to previous owners from whom such property had been seized by enemy forces; or

(5) minor articles of personal property which have lawfully become the property of individual members of the armed forces as war trophies pursuant to public written authorization from the Department of Defense.

(Pub. L. 103-236, title V, § 556, Apr. 30, 1994, 108 Stat. 483.)

§ 2301. Findings

Congress makes the following findings:

(1) Weapons of mass destruction and related materials and technologies are increasingly available from worldwide sources. Technical information relating to such weapons is readily available on the Internet, and raw materials for chemical, biological, and radiological weapons are widely available for legitimate commercial purposes.

(2) The former Soviet Union produced and maintained a vast array of nuclear, biological, and chemical weapons of mass destruction.

(3) Many of the states of the former Soviet Union retain the facilities, materials, and technologies capable of producing additional quantities of weapons of mass destruction.

(4) The disintegration of the former Soviet Union was accompanied by disruptions of command and control systems, deficiencies in accountability for weapons, weapons-related materials and technologies, economic hardships, and significant gaps in border control among the states of the former Soviet Union. The problems of organized crime and corruption in the states of the former Soviet Union increase the potential for proliferation of nuclear, radiological, biological, and chemical weapons and related materials.

(5) The conditions described in paragraph (4) have substantially increased the ability of potentially hostile nations, terrorist groups, and individuals to acquire weapons of mass destruction and related materials and technologies from within the states of the former Soviet Union and from unemployed scientists who worked on those programs.

(6) As a result of such conditions, the capability of potentially hostile nations and terrorist groups to acquire nuclear, radiological, biological, and chemical weapons is greater than at any time in history.

(7) The President has identified North Korea, Iraq, Iran, and Libya as hostile states which already possess some weapons of mass destruction and are developing others.

(8) The acquisition or the development and use of weapons of mass destruction is well within the capability of many extremist and terrorist movements, acting independently or as proxies for foreign states.

(9) Foreign states can transfer weapons to or otherwise aid extremist and terrorist movements indirectly and with plausible deniability.

(10) Terrorist groups have already conducted chemical attacks against civilian targets in

the United States and Japan, and a radiological attack in Russia.

(11) The potential for the national security of the United States to be threatened by nuclear, radiological, chemical, or biological terrorism must be taken seriously.

(12) There is a significant and growing threat of attack by weapons of mass destruction on targets that are not military targets in the usual sense of the term.

(13) Concomitantly, the threat posed to the citizens of the United States by nuclear, radiological, biological, and chemical weapons delivered by unconventional means is significant and growing.

(14) Mass terror may result from terrorist incidents involving nuclear, radiological, biological, or chemical materials.

(15) Facilities required for production of radiological, biological, and chemical weapons are much smaller and harder to detect than nuclear weapons facilities, and biological and chemical weapons can be deployed by alternative delivery means other than long-range ballistic missiles.

(16) Covert or unconventional means of delivery of nuclear, radiological, biological, and chemical weapons include cargo ships, passenger aircraft, commercial and private vehicles and vessels, and commercial cargo shipments routed through multiple destinations.

(17) Traditional arms control efforts assume large state efforts with detectable manufacturing programs and weapons production programs, but are ineffective in monitoring and controlling smaller, though potentially more dangerous, unconventional proliferation efforts.

(18) Conventional counterproliferation efforts would do little to detect or prevent the rapid development of a capability to suddenly manufacture several hundred chemical or biological weapons with nothing but commercial supplies and equipment.

(19) The United States lacks adequate planning and countermeasures to address the threat of nuclear, radiological, biological, and chemical terrorism.

(20) The Department of Energy has established a Nuclear Emergency Response Team which is available in case of nuclear or radiological emergencies, but no comparable units exist to deal with emergencies involving biological or chemical weapons or related materials.

(21) State and local emergency response personnel are not adequately prepared or trained for incidents involving nuclear, radiological, biological, or chemical materials.

(22) Exercises of the Federal, State, and local response to nuclear, radiological, biological, or chemical terrorism have revealed serious deficiencies in preparedness and severe problems of coordination.

(23) The development of, and allocation of responsibilities for, effective countermeasures to nuclear, radiological, biological, or chemical terrorism in the United States requires well-coordinated participation of many Federal agencies, and careful planning by the Federal Government and State and local governments.
